

BUYER'S GUIDE

LESSON PLANET for Schools & Districts

PROFESSIONAL EDITION

ENTERPRISE EDITION

Integrated Learning Object Repository (LOR)

Organize, centralize, and share instructional resources in a unified resource repository including open educational resources (OER), videos, and other digital materials.

Curated Educational Resources

Access more than 2.5 million educator-reviewed and vetted resources in the LOR including ad-free videos, lesson plans, activities, articles, and more.

Unified Resource Search & Discovery

Search and review all resources in the LOR with a single search using filters such as subject, grade, learning standards, resource type, instructional type, etc.

AI Teacher Tools

Quickly generate engaging lesson plans and teaching resources with AI-powered lesson tools: project ideas, vocabulary lists, bell ringers, lesson hooks, and more.

Drag & Drop Lesson Builder

Easily create lessons and collections of resources by dragging and dropping resources into a simple lesson builder interface; then edit, publish and share.

Google Tools Integration

Integrate existing resources stored in Google Docs, Forms, Slides, Sheets, Drawings, and Jamboards directly in lessons created with resources from the LOR.

LESSON PLANET for Schools & Districts

PROFESSIONAL EDITION

ENTERPRISE EDITION

Featured Content

Signal the importance of specific resources with the Featured Content badge to make resources visible and show them at the top of search results.

Seamless Lesson Player

Students interact with lessons and resources via a slideshow-like playlist experience delivered in a browser or linked in an LMS.

Administration Tools

Administrators can manage and control user visibility of resources in the LOR and see reporting for system, resource, and lesson collection usage.

Team Sharing & Collaboration

Teachers and teams, such as PLCs and grade-level teams, enjoy features to collaborate, review, edit, and share lessons.

Easy Integration With Your LMS

Search and assign resources or entire lessons from within Google Classroom, Canvas, or Schoology. Students can play lessons directly in the LMS.

Curriculum Design & Management

Leverage fully integrated curriculum management features to design, organize, and manage curriculum and enable teachers to create inspired lessons.

Content Moderation

Ensure that potentially sensitive content is tagged with the Sensitive Content badge. Districts choose the terms they wish to apply in their sensitive content tagging.

District-Published Resources

Centralize and organize district-created resources for teachers to search and use in lesson collections. Also, lessons can be published, shared, and re-used.

Advanced Administration Tools

Manage permissions and workflow for district-published resources and lessons, and leverage advanced usage reporting and analytics.
