

Pathways Learning Studio

Designed for today's classrooms, Pathways Learning Studio connects instruction, assessment, and insights to support meaningful teaching and learning.

One platform. Connected learning. Stronger outcomes.

Disconnected education solutions can limit instructional impact, reduce efficiency, and make it difficult to see a clear picture of students' progress and growth. Pathways Learning Studio addresses these challenges by connecting proven assessment and learning solutions with engaging resources and insightful analytics—all in a single platform.

Connection that drives impact.

Pathways Learning Studio builds on a trusted foundation of time-tested capabilities, expanding through thoughtful integration that supports teaching and learning.

Students engage with interactive, self-paced learning paths and targeted practice, with multiple opportunities for standards-aligned assessment embedded throughout their learning journey.

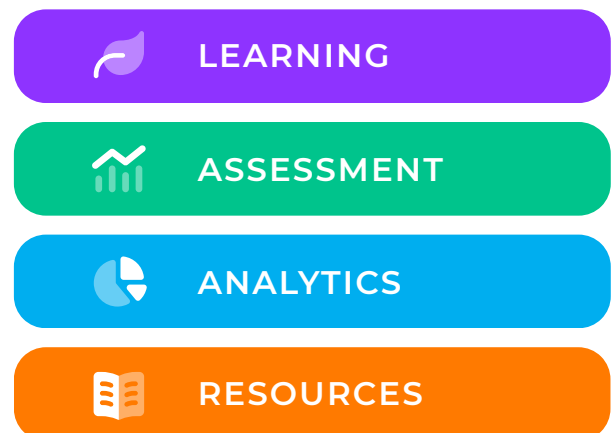

Teachers can access classroom resources—videos, practice assessments, and AI-assisted instructional materials—directly within the platform. Available before and after each assessment, these resources support timely, focused practice, remediation, intervention, and enrichment—driving continued progress.

Coming later in the 2026–27 school year, Pathways Learning Studio will enhance existing analytics and reporting by integrating summative and formative assessment data with student mastery insights. This integration will support deeper learning and give districts a clearer view of performance and growth.

Why this matters for districts.

Pathways Learning Studio is designed to:

- Strengthen alignment between learning and assessment
- Simplify and unify navigation across tools and workflows
- Connect data across student interactions and assessments
- Increase educator efficiency and instructional time
- Deliver a cohesive, personalized learning experience

Every student has a next step

Pathways Learning Studio enables educators to find and sustain personalized learning paths that move every student forward. The platform integrates comprehensive assessment and mastery learning to identify learning gaps, measure student growth and proficiency, and guide educators toward the most effective next steps.

LEARNING

Pathways Learning provides individualized, self-paced learning paths that identify gaps in real time and respond with continuous, adaptive scaffolding and just-in-time instruction. Teachers can also leverage targeted practice to provide focused intervention support tailored to each learner's unique needs.

ASSESSMENT

Pathways Assessment is a comprehensive, standards-aligned assessment module featuring rigorous, customized benchmarks, prebuilt assessments, and formative item banks. It helps educators measure progress, monitor proficiency, and make informed decisions to guide instruction and determine next steps.

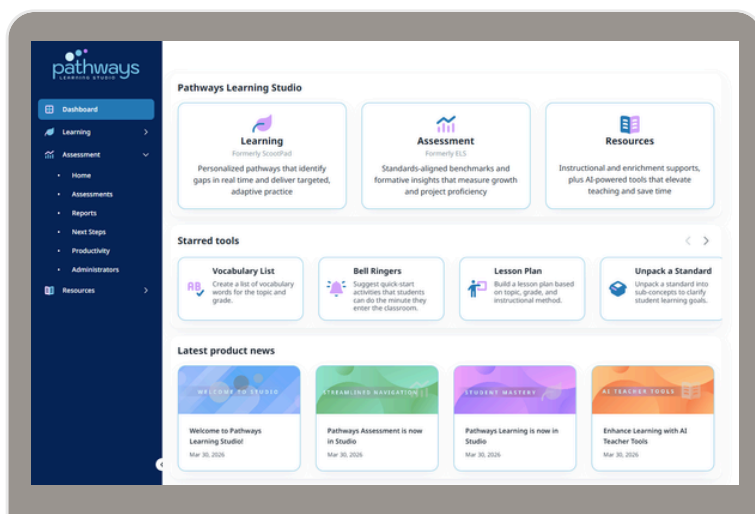

ANALYTICS

Later in the 2026-27 school year, Pathways Learning Studio will offer integrated reporting and analytics that connect multiple data points across the student learning journey. These insights will help educators track growth, monitor performance, and make data-driven decisions to support achievement.

RESOURCES

Pathways Resources offers classroom-ready instructional and enrichment supports designed to deepen student understanding. With AI-powered teacher tools, educators can quickly generate standards-aligned lesson plans, activities, assessments, and projects to support effective instruction.

Focused on student success.

Explore Pathways Learning Studio and experience a more connected approach to teaching and learning. District leaders and educators don't need more solutions—they need a platform that brings everything together.
